

## INFORMATION DELIVERY

I WANT THIS INFORMATION BY TOMORROW . . . have you heard this before?

Maybe you're the CEO or a Senior Vice President. Or maybe you're an analyst, and the executive is depending on your recommendations. Perhaps you are the customer-service representative, and the customer expects you to know all about him, or to provide accurate information via the customer portal.

Either way, you can't afford to be ill-informed. And time is a luxury you most likely do not have.

This is a common situation. And it usually means a choice between long hours or shooting from the hip. There are huge amounts of data concentrated in singular decisions at the upper levels of the corporation, and in choices made by investors. There is a lesser volume of data involving a single customer, but it's lost among the millions of bytes of customer data collected daily.

Businesses today are faced with the challenge of supporting rapidly growing volumes of data and user demands for flexible and timely access to valuable information. An even greater challenge is extracting the elusive "single version of the truth" from key business data due to the lack of an integrated, accurate view of the enterprise.

It is important to treat information delivery with the respect required for the important decisions riding on it. A real reporting solution **is not** a mere add-on to a Data Warehouse, CRM, or ERP system.

### WHAT SISG CAN DO FOR YOU

SISG has proven experience in providing the business and technical expertise required to extract key business data from corporate systems and deliver it based on your specific user requirements.

We partner with you to implement an Information Delivery Solution that meets your specific requirements and enables your organization to more effectively access information, analyze and share information through packaged solutions.

Bottom line, SISG consultants understand business.

Many of our consultants have business management experience, advanced business degrees, and CPA certifications, enabling them to quickly understand your strategic metrics and design the reporting solutions and feedback mechanisms that help you achieve corporate goals. We have progressed through successful industry career tracks prior to sharing accumulated knowledge as consultants. We have designed reporting applications across many industries, inventing ground-breaking analytical methods and best practices that provide competitive advantage in your industry.

Please refer to our **Tools Assessment** service offering to see how we can assist you in evaluating and selecting the right information delivery tools for your user base that will also complement your technical environment and long-term plan.

### DELIVERABLES

- Information Access & Delivery Plan
- Tool assessment and selection
- Tool installation, configuration and training

**Strategic  
Information  
Systems  
Group**

3400 Dundee Rd  
Suite 305  
Northbrook, IL  
60062  
847.205.4085

Client Services  
888.372.1815
